SUSPENSION AND RIDE CONTROL

You take your X with you everywhere, so we make them prepared for anything. Adjustable suspensions adapt to various terrain while providing excellent body control for sports car-like reflexes. Working with xDrive and the rear-differential, each X vehicle has a setup perfectly suited for its character and yours.

xDRIVE INTELLIGENT ALL-WHEEL DRIVE

With xDrive, The Ultimate Driving Machine® reigns supreme, no matter the road conditions. Working in tandem with Dynamic Stability Control and the Anti-lock Braking System, xDrive constantly monitors wheel grip at all four corners of your BMW and distributes power as needed. To maintain the handling balance BMWs are renowned for, many feature a 40:60 rear-drive power bias is maintained during normal conditions.

LIVE COCKPIT PROFESSIONAL

We always look toward the future for new innovations, and our latest example is Live Cockpit Professional with iDrive 7.0. Integrating voice commands, the BMW Navigation System, a digital display cluster, an all-new iDrive controller and a larger iDrive display, it will keep you informed of the world around you as you drive.

¹Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

²Performance tires are not recommended for driving in ice and snow conditions.

³Run-flat tires do not come equipped with a spare wheel and tire; non-run-flat tires come equipped with a Mobility Kit.
